Portfolio: www.salleeee.com

5 years in product design, specializing in fintech and digital banking. I lead research-driven design, mentor designers, and partner cross-functionally to translate user insights into measurable impact. Detail-oriented strategist who balances empathy, business goals, and technical constraints.

Work Experience

Intermediate Product Designer · **Fintex Inc.** Aug 2025 — Present

Product Designer · Nov 2024 — Jul 2025

- Led end-to-end product design for a wealth management and investing platform, spanning desktop and mobile experiences, from discovery through delivery.
- Partnered closely with Product Managers, Engineers, QA, and Business stakeholders to translate complex financial requirements into clear, user-friendly solutions.
- Conducted user research and design validation to identify pain points and inform design decisions across onboarding, dashboards, and planning tools.
- Contributed to internal design system and workflow optimization using Claude Code, shipping design-to-code implementations as production PRs.
- Designed high-fidelity prototypes and production-ready designs in Figma, ensuring consistency with established design systems and accessibility standards.
- Collaborated cross-functionally to support feature delivery, design QA, and iterative improvements, ensuring alignment between design intent and development output.
- Presented design rationale and trade-offs to internal stakeholders, balancing user needs, technical constraints, and business goals.
- Mentored junior designers on problem-solving methodology and cross-functional advocacy.

Selected Projects

- **Tangerine Digital Wealth Platform (MVP):** Led launch of core investing and planning experience, driving 22.3% adoption (+12.3 percentage points MoM) and 46.6% mobile engagement with 67.2k active clients. Diagnosed and solved three critical user friction points through research and iteration: entry-point discovery, external asset completion flow, and asset projection accuracy through insight-driven prompts. Owned end-to-end research-to-analytics feedback cycle.
- **Enterprise Supervision & Compliance Platform (RBC Wealth Management):** Designed enterprise compliance tools for supervisors to monitor advisor activities, review regulatory exceptions, and manage investment rules. Simplified complex workflows through intuitive dashboards, data tables, and rule management interfaces. Collaborated with cross-functional teams to deliver scalable UX solutions, high-fidelity prototypes, and developer-ready design specifications.

UX & UI Designer · **EY Mtel Solutions Ltd.** Mar 2022 — Apr 2023

- Led end-to-end design from scratch and revamp web/mobile (iOS & Android) products for corporate clients.
- Collaborated on in-depth research, conducted user interviews, and performed usability testing to identify pain points and deliver effective design solutions.
- Communicated with cross-functional teams, developers and presented to clients, ensuring successful project execution and product launches.
- Facilitated design thinking workshop for major corporations, promoting innovation and user-centric design.
- Created and maintained UI design guidelines for the entire product for product consistency.

Selected Projects

- **Loyalty Membership App:** Led a successful launch with 46K+ downloads in the inaugural season. Orchestrated user engagement, membership integration, and a seamless transition with in-app points conversion for improved user experience and retention.
- **Electric Utility Website:** Achieved a 50% reduction in bounce rate and received a 95% positive user feedback rate. Created a user-friendly platform for global investors to easily understand their business.

Product Designer · **Sallee Studio Ltd.** Jan 2022 — Present

- Specializes in creating impactful digital products, websites, and visuals tailored to client needs.
- **Heima 1996 Ltd. (Select Store):** Conducted a comprehensive evaluation from scratch, repositioned the brand, and redesigned the website, achieving a 35% increase in traffic and a 25% sales boost. Improved project efficiency and budget evaluations.
- **Health Coach Howard Ltd. (Health Service):** Implemented a streamlined booking system, reducing the steps from 5 to 2. Improved booking actions and scheduling efficiency with engagement strategies.

Skills

Core: Figma (flows, design systems), user research, usability testing, analytics & measurement, accessibility (WCAG 2.1 AA)

Technical: Design-to-code with Claude Code, Github, Storybook, Jira

Domain expertise: Fintech, digital banking, wealth management

Education

The Hong Kong Polytechnic University

— Bachelor of Interactive Media

— Higher Diploma of Multimedia design and technology

Languages

Multilingual; Fluent in English, Cantonese, Mandarin
